-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2871

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 13-24 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. 6,680,758. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims are *broader* in scope than the patent claims and all of the features of the instant claims are *disclosed* by the patent claims 1-13. For example, compare the instant claim 13 with patent claims 2 and 3. Patent claim 2 recites "the first stage of said plurality stages includes a branch for directing said (electromagnetic) radiation to a similar branch in each succeeding stage, each of said stages containing 2^{n-1} branches where n is the stage number" while patent claim 3 recites "An array according to claim 2 wherein each of said branches includes an active element for directing said electromagnetic radiation into one of first and second paths and a passive element disposed in said second path for directing said radiation into a path parallel to said first path when said energy is directed into said second

Art Unit: 2871

path". Also, compare the source of said electromagnetic energy of the instant claim 14 with the plurality of sources of electromagnetic radiation of the patent claim 1. Lastly, compare the instant claims 15-24 with the patent claims 5-14.

Claims 13-24 are allowed over the prior art of record because none of the prior art discloses or suggests a logic tree having the combination of the feature "a plurality of stages, the first of said stages including a branch for directing said energy to a similar branch in each succeeding stage, each of said stages containing 2^{n-1} branches where n is the stage number" and the feature "wherein each of said branches includes an active element for directing said electromagnetic energy into one of first and second paths and a passive element disposed in said second path for directing said electromagnetic energy into a path parallel to said first path when said energy is directed into said second path".
